

Elderly and Poverty

Percent of Persons Age 60+ Whose Financial Status is Below the Poverty Guideline

This Indicator Measures...the percent of adults age 60 years and over whose financial status is below the poverty guideline for their family size.

This is Important Because... Poverty can affect many aspects of a person's living condition including housing, health and nutrition.

Source: Florida Department of Elder Affairs

Note: The Flagler rate increased steadily over the reporting period. The Volusia rate fluctuated slightly over the reporting period and ended essentially as it began.

Elder Suicide

Three-Year Rolling Rate* of Suicide, Ages 60+, Per 100,000 Population

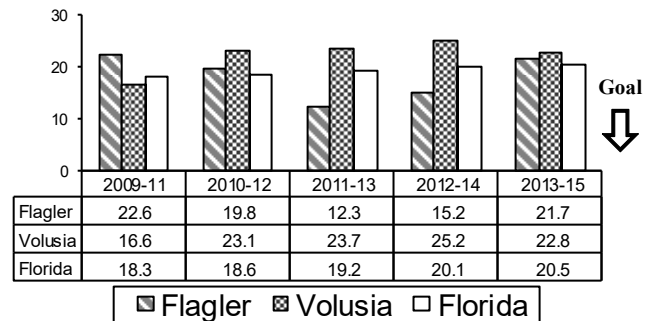

This Indicator Measures...the rate of suicide for ages 60 and over, per 100,000 population in Flagler and Volusia Counties.

This is Important Because...according to the National Strategy for Suicide Prevention, suicide disproportionately impacts the elderly.

Source: FLHealthCHARTS

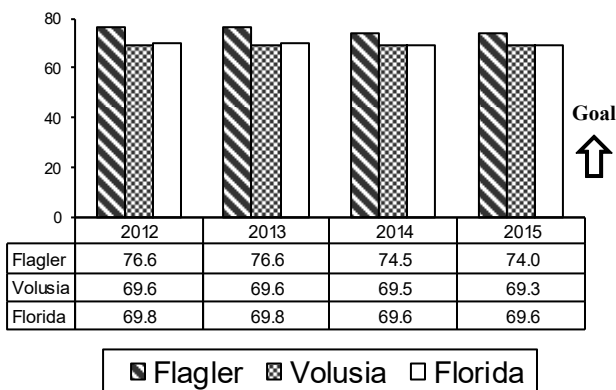

Note: The Flagler County rate fluctuated over the reporting period. The Volusia County rate increased through 2012-14, decreased in 2013-15 and increased overall during the reporting period.

*The three-year rolling rate is an average value of an indicator over three rolling 3-year time periods and were used here in order to flatten out large fluctuations due to the low incidence.

Elderly with No Disabilities

Percent of Adults Age 60+ With No Disabilities

This Indicator Measures... the percent of adults age 60 years and over with no disabilities.

This is Important Because... Elderly adults with no disabilities may be able to maintain their independence and require fewer health and human services.

Source: Florida Department of Elder Affairs

Note: The rate in Flagler County decreased over the reporting period. The Volusia County rate remained steady.
